

# Andrei Ferreira

## Full-Stack Engineer

andreitf.dev@gmail.com | +55 75 99856-9425 | Brazil | [linkedin.com/in/andreitf](https://www.linkedin.com/in/andreitf) | [github.com/vorsakha](https://github.com/vorsakha)

### SUMMARY

Full-stack engineer building web and mobile products since 2021 with TypeScript, React, Node.js, and PostgreSQL. Led frontend architecture and delivered workflows spanning interfaces, APIs, and relational data models. Professional experience includes SaaS, healthcare, logistics, and PHP backends, alongside open-source agent tooling.

### SKILLS

**Languages:** TypeScript, JavaScript, SQL, PHP, HTML, CSS

**Backend and data:** Node.js, NestJS, Express, PostgreSQL, MongoDB, Doctrine, REST APIs, GraphQL, OpenAPI

**Frontend:** React, Next.js, React Native, TanStack Query, React Hook Form, Zod, Tailwind CSS, shadcn/ui, Material UI

**Testing and tooling:** Jest, React Testing Library, Cypress, Git, Docker, CI, multi-agent orchestration

### EXPERIENCE

#### Coderockr

November 2021 - Present

Fullstack Engineer

#### Geospatial and contract management products

June 2026 - Present

- Delivered PDF comment attachments across PHP, Doctrine, and the frontend, with role checks, upload validation, encrypted storage, transactional rollback, and visibility rules
- Built shareable map views with validated URL-state restoration, permission-gated cloning, configurable legends, and keyboard-accessible layer administration

#### Orca V2 | Supplier budgeting SaaS

November 2024 - June 2026

- Led frontend architecture for a React and TypeScript rebuild, using TanStack Query, Zod, and a shadcn/ui and Radix component system for client-specific customization
- Delivered budgeting and product-variant workflows across React, NestJS, and PostgreSQL, accounting for brand approvals and relationships between brands and establishments

#### Raster Siga Verde | Environmental compliance

June 2023 - November 2024

- Built an environmental-compliance logistics platform with React, Node.js, Express, and PostgreSQL, implementing APIs and relational schemas for domain workflows
- Led frontend work and introduced TanStack Query caching, granular loading states, and Zod form validation to improve the experience around slow emissions calculations

#### Earlier client projects

November 2021 - June 2023

- Developed a healthcare application with React Native, GraphQL, and real-time synchronization for a dialysis hospital managing 108K patient sessions annually
- Built Orca V1 and SEO-oriented Next.js sites; added a PDF viewer, Redux Toolkit state, and Cypress coverage to LogRock; delivered responsive interfaces for The Key NLP

### OPEN SOURCE

#### Pi Native Subagents | MIT

[github.com/vorsakha/pi-native-subagents](https://github.com/vorsakha/pi-native-subagents)

- Built a TypeScript extension that runs background agents across Pi, Claude Code, and Codex, with capability-based routing, retained follow-ups, and multi-phase workflows
- Implemented access policies, read-only sandboxing, provider-readiness checks, and supervision dashboards

### EDUCATION AND LANGUAGES

BSc in Computer Science, Universidade Salvador, Brazil | December 2018

Portuguese: native | English: EF SET C2 Proficient, 75/100, 2022
